About me

I'm Md Jihadul Islam work as a MERN stack developer over 4+ years at this field. I love to develop frontend User experience based on popular JavaScript library. Enthusiastic and skilled MERN Stack Developer with strong foundational knowledge in MongoDB, Express, React, and Node.js. Demonstrated ability to build responsive, user-friendly web applications through personal and academic projects. Adept at problem-solving and eager to contribute to dynamic development teams.

Project Experience:

Inovet

Developed an interactive webpage featuring animated SVG icons, CSS hover effects, and a responsive layout.Used CSS keyframes for smooth transitions and JavaScript to control animations based on user interactions.
